DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Damrath (DE 100 63 669). Damrath illustrates in an outer inflatable body 1 and an inner inflatable body 2 with the inner and outer inflatable bodies being in contact with one another, in particularly, at the front and sides of the torso sections and the chest sections, with the inner and outer inflatable bodies being air permeable.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Damrath (DE 100 63 669) in view of Paris (US 3,568,900). Damrath illustrates in an outer inflatable body 1 and an inner inflatable body 2 with the inner and outer inflatable bodies being in contact with one another, in particularly, at the front and sides of the torso sections and the chest sections, with the inner and outer inflatable bodies being air permeable. Damrath does not teach the contact areas having a portion with a greater air permeability to assist in drying of sleeves and pockets. Paris teaches the use of greater air permeability for the drying of pockets (Col. 1 lines 70-73). It would have been obvious to one of ordinary skill in the art to modify the teachings of Damrath with the air permeability of Paris to assist in the drying of garment portions that are thicker.

As to claims 13-19, With respect to the limitations of the ranges of permeability, the specification contains no disclosure of either the critical nature of the claimed permeability or any unexpected results arising therefrom, and that as such the ranges of permeability was arbitrary and therefore obvious. Such permeability limitation cannot be a basis for patentability, since where patentability is said to be based upon diameter or another permeability or another variable in the claim, the applicant must show that the ranges of permeability is critical. In re Woodruff, 919 F.2d 1575, 1578, 16 USPQ2d 1934 (Fed. Cir. 1990). One having ordinary skill in the art would be able to determine though routine experimentation the ideal dimension for a particular application.

As to claim 19, With respect to the limitation of a range of pressure ratio, the specification contains no disclosure of either the critical nature of the claimed pressure

Art Unit: 3765

ratio or any unexpected results arising therefrom, and that as such the range of pressure ratio was arbitrary and therefore obvious. Such pressure ratio limitation cannot be a basis for patentability, since where patentability is said to be based upon diameter or another pressure ratio or another variable in the claim, the applicant must show that the range of pressure ratio is critical. In re Woodruff, 919 F.2d 1575, 1578, 16 USPQ2d 1934 (Fed. Cir. 1990). One having ordinary skill in the art would be able to determine though routine experimentation the ideal dimension for a particular application.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
